

2021 SIENNA HYBRID

Accessible Hybrid Vehicle Only from Freedom Motors

Freedom Motors USA is the first to create a rear-entry wheelchair accessible conversion of the Toyota Sienna Hybrid that leaves the hybrid drivetrain completely untouched. The 2021 Sienna features a complete redesign on the inside and out, providing a new experience that will make you forget everything you thought you knew about a minivan.

- **Extremely Efficient** - The 2021 Toyota Sienna Hybrid provides up to 36 MPG, the best in its class and the best MPG available for a wheelchair accessible vehicle.
- **No Charging Required** - The Sienna's hybrid engine stores electric power while you drive, meaning that you never have to worry about plugging in or charging your car.
